Int. J. Gynecol. Obstet., 1988, 27: 495—499
International Federation of Gynecology and Obstetrics

Subject Index

Volume 27

abdominal pregnancy, hemoperitoneum, hepatic pregnancy, 427
abnormal uterine contractions, coupling, dysfunctional labor, 69
abortion, ELISA of urinary hormones, 107
abruptio placentae, eclampsia, maternal mortality, 335
adrenocorticotropin test, unexplained infertile women, 219
amniotic fluid volume, intrauterine growth retardation, perinatal mortality rate, 185
annual rates, Spring Coil IUD, ten year follow-up, Hungarian experience, cumulative rates, 123
antepartum death, kick chart, developing country, stillbirth, fetal activity, fetal monitoring, 353
antithrombin III, pre-eclampsia, chronic hypertension, hematologic changes in pregnancy, disseminated intravascular disease in pregnancy hypercoagulability in pregnancy, 21
Apgar scores, breech, umbilical arterial pH, 37
ascites, endometriosis, laparoscopy, infertility, 439
association with pregnancy, Brenner tumor, bilateral, secondary polycythaemia, 455
autopsy, congenital malformations, perinatal deaths, singleton births, prevalence, 63
avoidable factors, maternal mortality, state wide study, causes, prevention, 365

Bangladesh, menstrual regulation, training and service programs, 265
bilateral, Brenner tumor, secondary polycythaemia, association with pregnancy, 455
birth, pattern, international, 25
body mass index, lipids, lipoproteins, polycystic ovarian disease, sex steroids, obesity, 401
breech, Apgar scores, umbilical arterial pH, 37
breech, pelvimetry, delivery, labor, outcome, England, 17
breech/breech presentation, breech deliveries, twin-1 breech, twin-2 breech, perinatal mortality, 11
breech deliveries, twin-1 breech, twin-2 breech, breech/breech presentation, perinatal mortality, 11
Brenner tumor, bilateral, secondary polycythaemia, association with pregnancy, 455

Canada, morbidity, mortality, malignancies, corpus uteri, trends, 205
carcinoma cervix, LDH isoenzymes, clinical radiation response, 91
career, specialisation, subspecialisation, 293
causes, maternal mortality, state wide study, avoidable factors, prevention, 365
cephalo-pelvic disproportion, pelvic assessment sacral promontory, 323
cervical cancer, ethnic variation, Tanzania, 395
cervical carcinoma staging, computed tomography, uterine neoplasms, pelvic neoplasia, 213
cervical cerclage, obstetrical infection, 359
cervical encerclage, habitual abortion, premature labor, cervical incompetence, fetal salvage, 389
cervical incompetence, habitual abortion, premature labor, cervical encerclage, fetal salvage, 389
cervico-vaginal fistula, spontaneous abortion, 139
cesarean section, maternal age, fetal distress, 51
cesarean section, mode of delivery, respiratory distress syndrome, vaginal delivery, labor, 165
cesarean section, single layer, conventional closure, uterine incision, strength of uterine scar, strain of labor, 349
chemotherapy, ovarian cancer, randomised trial, comparison of CP, CAP and CEP combinations, 199
child bearing, implications, postpubertal girls, 73
chlamydial culture, chlamydial serology, *Chlamydia trachomatis,* seroepidemiology in developing countries, 377
chlamydial serology, *Chlamydia trachomatis,* chlamydial culture, seroepidemiology in developing countries, 377
Chlamydia trachomatis, chlamydial serology, chlamydial culture, seroepidemiology in developing countries, 377
Chlamydia trachomatis, urogenital infections, 381
choriocarcinoma, hydatidiform mole, metastatic gestational trophoblastic neoplasm, trophoblast, methotrexate, human chorionic gonadotropin, 421
chronic hypertension, antithrombin III, pre-eclampsia, hematologic changes in pregnancy, disseminated intravascular disease in pregnancy hypercoagulability in pregnancy, 21
clinical radiation response, LDH isoenzymes, carcinoma cervix, 91
colpopuncture, ectopic pregnancy, diagnosis, management, 371
comparison of CP, CAP and CEP combinations, ovarian cancer, chemotherapy, randomised trial, 199
computed tomography, cervical carcinoma staging, uterine neoplasms, pelvic neoplasia, 213
congenital malformations, perinatal deaths, singleton births, autopsy, prevalence, 63
conservative or radical treatment, ectopic pregnancy, serum pregnancy specific 1-glycoprotein, 225
conventional closure, single layer, uterine incision, cesarean section, strength of uterine scar, strain of labor, 349
corpus uteri, morbidity, mortality, malignancies, trends, Canada, 205
coupling, abnormal uterine contractions, dysfunctional labor, 69

cross-sectional study, ultrasound biparietal diameter, fetal abdominal circumference, transverse abdominal circumference, mixed Nigerian population, 1
cumulative rates, Spring Coil IUD, ten year follow-up, Hungarian experience, annual rates, 123
cyclofenil, graafian follicle ovulation, 231

deep body temperature, pre-eclampsia, vascular response, microcirculation, 159
delivery, breech, pelvimetry, labor, outcome, England, 17
developing country, kick chart, stillbirth, fetal activity, antepartum death, fetal monitoring, 353
developing country, maternal mortality after cesarean section, sepsis, obstructed labor, prophylactic antibiotics, national programmes, 171
diabetes, oral glucose tolerance test, plasma glucose, pregnancy, 85
diagnosis, ectopic pregnancy, management, colpopuncture, 371
disseminated intravascular disease in pregnancy antithrombin III, pre-eclampsia, chronic hypertension, hematologic changes in pregnancy, hypercoagulability in pregnancy, 21
dysfunctional labor, abnormal uterine contractions, coupling, 69
dystocia, fetal sacrococcygeal teratoma, 431

eclampsia, abruptio placentae, maternal mortality, 335
ectopic pregnancy, conservative or radical treatment, serum pregnancy specific 1-glycoprotein, 225
ectopic pregnancy, diagnosis, management, colpopuncture, 371
ELISA of urinary hormones, abortion, 107
embolic phenomenon, mitral valve prolapse, retinal artery occlusion, 133
endometriosis, ascites, laparoscopy, infertility, 439
endometrium, ultrasonics, progesterone, estrogen, ovulation, human, 407
endosalpingeal ultrastructure, percentage of ciliated cells, reproductive success, 239
endoscopic suspension, vaginal prolapse, surgery, 451
endoscopy, fibroscope, 97
England, breech, pelvimetry, delivery, labor, outcome, 17
estrogen, ultrasonics, endometrium, progesterone, ovulation, human, 407
ethnic variation, cervical cancer, Tanzania, 395

family planning practice, student midwives, Nigeria, 415
female sterilization, sterilization failure, lifetable technique, logistic regression analysis, lifetable cumulative failure rate, 255
fetal abdominal circumference, ultrasound biparietal diameter, transverse abdominal circumference, cross-sectional study, mixed Nigerian population, 1
fetal activity, kick chart, developing country, stillbirth, antepartum death, fetal monitoring, 353
fetal distress, cesarean section, maternal age, 51
fetal macrosomia, glucose screening, pregnancy, 181
fetal monitoring, kick chart, developing country, stillbirth, fetal activity, antepartum death, 353
fetal sacrococcygeal teratoma, dystocia, 431
fetal salvage, habitual abortion, premature labor, cervical incompetence, cervical encerclage, 389
fibroscope, endoscopy, 97
first trimester, nausea, vomiting, hyperemesis gravidarum, morning sickness, pregnancy, 57

glucose screening, pregnancy, fetal macrosomia, 181
graafian follicle ovulation, cyclofenil, 231

habitual abortion, premature labor, cervical incompetence, cervical encerclage, fetal salvage, 389
βhCG, LHRH, remission criteria, trophoblastic disease, 193
height, large infant, maternal age, parity, weight, social class, obstetric complications, 343
hematologic changes in pregnancy, antithrombin III, pre-eclampsia, chronic hypertension, disseminated intravascular disease in pregnancy hypercoagulability in pregnancy, 21
hemipelvectomy, pregnancy, 277
hemoperitoneum, abdominal pregnancy, hepatic pregnancy, 427
hemorrhage, placenta percreta, infiltration, hysterectomy, 285
hepatic pregnancy, abdominal pregnancy, hemoperitoneum, 427
histopathology, tubal pregnancy, trophoblast invasion, salpingotomy, 385
hormonal contraception, postmenarche, ovarian function, 249
human, ultrasonics, endometrium, progesterone, estrogen, ovulation, 407
human chorionic gonadotropin, hydatidiform mole, choriocarcinoma, metastatic gestational trophoblastic neoplasm, trophoblast, methotrexate, 421
Hungarian experience, Spring Coil IUD, ten year follow-up, cumulative rates, annual rates, 123
hydatidiform mole, choriocarcinoma, metastatic gestational trophoblastic neoplasm, trophoblast, methotrexate, human chorionic gonadotropin, 421
α-hydroxybutyrate dehydrogenase, ovarian dysgerminoma, serum lactic dehydrogenase, isoenzymes of lactic dehydrogenase, 459
hypercoagulability in pregnancy, antithrombin III, pre-eclampsia, chronic hypertension, hematologic changes in pregnancy, disseminated intravascular disease in pregnancy 21
hyperemesis gravidarum, nausea, vomiting, morning sickness, pregnancy, first trimester, 57
hyperprolactinemia, infertility, sexual dysfunction, 273
hypertension in pregnancy, reproductive history, reproductive capacity, 45
hysterectomy, placenta percreta, infiltration, hemorrhage, 285

implications, child bearing, postpubertal girls, 73
infertility, ascites, endometriosis, laparoscopy, 439
infertility, hyperprolactinemia, sexual dysfunction, 273

infertility, pelveo-peritoneal schistosomiasis, *Schistosoma haematobium*, 467
infiltration, placenta percreta, hemorrhage, hysterectomy, 285
inguinal hernia, Mullerian developmental abnormality, 141
international, pattern, birth, 25
intrauterine growth retardation, amniotic fluid volume, perinatal mortality rate, 185
isoenzymes of lactic dehydrogenase, ovarian dysgerminoma, serum lactic dehydrogenase, α-hydroxybutyrate dehydrogenase, 459

kick chart, developing country, stillbirth, fetal activity, antepartum death, fetal monitoring, 353

labor, breech, pelvimetry, delivery, outcome, England, 17
labor, mode of delivery, respiratory distress syndrome, vaginal delivery, cesarean section, 165
laparoscopy, ascites, endometriosis, infertility, 439
large infant, maternal age, parity, weight, height, social class, obstetric complications, 343
LDH isoenzymes, carcinoma cervix, clinical radiation response, 91
LHRH, β-hCG, remission criteria, trophoblastic disease, 193
lifetable cumulative failure rate, female sterilization, sterilization failure, lifetable technique, logistic regression analysis, 255
lifetable technique, female sterilization, sterilization failure, logistic regression analysis, lifetable cumulative failure rate, 255
lipids, lipoproteins, polycystic ovarian disease, body mass index, sex steroids, obesity, 401
lipoproteins, lipids, polycystic ovarian disease, body mass index, sex steroids, obesity, 401
logistic regression analysis, female sterilization, sterilization failure, lifetable technique, lifetable cumulative failure rate, 255

malignancies, morbidity, mortality, corpus uteri, trends, Canada, 205
management, ectopic pregnancy, diagnosis, colpopuncture, 371
maternal age, cesarean section, fetal distress, 51
maternal age, large infant, parity, weight, height, social class, obstetric complications, 343
maternal mortality, eclampsia, abruptio placentae, 335
maternal mortality, state wide study, causes, avoidable factors, prevention, 365
maternal mortality after cesarean section, sepsis, obstructed labor, prophylactic antibiotics, national programmes, developing country, 171
menstrual regulation, training and service programs, Bangladesh, 265
metastatic gestational trophoblastic neoplasm, hydatidiform mole, choriocarcinoma, trophoblast, methotrexate, human chorionic gonadotropin, 421
methotrexate, hydatidiform mole, choriocarcinoma, metastatic gestational trophoblastic neoplasm, trophoblast, human chorionic gonadotropin, 421
microcirculation, pre-eclampsia, deep body temperature, vascular response, 159
mitral valve prolapse, retinal artery occlusion, embolic phenomenon, 133
mixed Nigerian population, ultrasound biparietal diameter, fetal abdominal circumference, transverse abdominal circumference, cross-sectional study, 1
mode of delivery, respiratory distress syndrome, vaginal delivery, cesarean section, labor, 165
morbidity, mortality, malignancies, corpus uteri, trends, Canada, 205
morning sickness, nausea, vomiting, hyperemesis gravidarum, pregnancy, first trimester, 57
mortality, morbidity, malignancies, corpus uteri, trends, Canada, 205
Mullerian developmental abnormality, inguinal hernia, 141

national programmes, maternal mortality after cesarean section, sepsis, obstructed labor, prophylactic antibiotics, developing country, 171
nausea, vomiting, hyperemesis gravidarum, morning sickness, pregnancy, first trimester, 57
Nigeria, family planning practice, student midwives, 415

obesity, lipids, lipoproteins, polycystic ovarian disease, body mass index, sex steroids, 401
obstetrical infection, cervical cerclage, 359
obstetric complications, large infant, maternal age, parity, weight, height, social class, 343
obstructed labor, maternal mortality after cesarean section, sepsis, prophylactic antibiotics, national programmes, developing country, 171
oral glucose tolerance test, plasma glucose, diabetes, pregnancy, 85
oral glucose tolerance test, pregnancy, 7
outcome, breech, pelvimetry, delivery, labor, England, 17
ovarian cancer, chemotherapy, randomised trial, comparison of CP, CAP and CEP combinations, 199
ovarian dysgerminoma, serum lactic dehydrogenase, isoenzymes of lactic dehydrogenase, α-hydroxybutyrate dehydrogenase, 459
ovarian function, postmenarche, hormonal contraception, 249
ovarian tumors, pathology of pregnancy, 79
ovulation, ultrasonics, endometrium, progesterone, estrogen, human, 407

parity, large infant, maternal age, weight, height, social class, obstetric complications, 343

pathology of pregnancy, ovarian tumors, 79
pattern, international, birth, 25
pelveo-peritoneal schistosomiasis, infertility, *Schistosoma haematobium*, 467
pelvic assessment cephalo-pelvic disproportion, sacral promontory, 323
pelvic neoplasia, computed tomography, cervical carcinoma staging, uterine neoplasms, 213
pelvimetry, breech, delivery, labor, outcome, England, 17

percentage of ciliated cells, endosalpingeal ultrastructure, reproductive success, 239
perinatal deaths, congenital malformations, singleton births, autopsy, prevalence, 63
perinatal mortality, breech deliveries, twin-1 breech, twin-2 breech, breech/breech presentation, 11
perinatal mortality rate, amniotic fluid volume, intrauterine growth retardation, 185
perinatal outcome, polyhydroamnios, 327
placenta percreta, infiltration, hemorrhage, hysterectomy, 285
plasma glucose, oral glucose tolerance test, diabetes, pregnancy, 85
polycystic ovarian disease, lipids, lipoproteins, body mass index, sex steroids, obesity, 401
polyhydroamnios, perinatal outcome, 327
postmenarche, ovarian function, hormonal contraception, 249
postmenopausal E_2 concentrations, postmenopausal endometrium, postmenopausal endometrial hyperplasia and/or malignancy, 101
postmenopausal endometrial hyperplasia and/or malignancy, postmenopausal endometrium, postmenopausal E_2 concentrations, 101
postmenopausal endometrium, postmenopausal E_2 concentrations, postmenopausal endometrial hyperplasia and/or malignancy, 101
postpubertal girls, implications, child bearing, 73
pre-eclampsia, antithrombin III, chronic hypertension, hematologic changes in pregnancy, disseminated intravascular disease in pregnancy hypercoagulability in pregnancy, 21
pre-eclampsia, deep body temperature, vascular response, microcirculation, 159
pregnancy, glucose screening, fetal macrosomia, 181
pregnancy, hemipelvectomy, 277
pregnancy, nausea, vomiting, hyperemesis gravidarum, morning sickness, first trimester, 57
pregnancy, oral glucose tolerance test, 7
pregnancy, oral glucose tolerance test, plasma glucose, diabetes, 85
pregnancy termination, prostaglandin E_2-gel, therapeutic abortion, 119
premature labor, habitual abortion, cervical incompetence, cervical encerclage, fetal salvage, 389
prevalence, congenital malformations, perinatal deaths, singleton births, autopsy, 63
prevention, maternal mortality, state wide study, causes, avoidable factors, 365
progesterone, ultrasonics, endometrium, estrogen, ovulation, human, 407
prophylactic antibiotics, maternal mortality after cesarean section, sepsis, obstructed labor, national programmes, developing country, 171
prostaglandin E_2-gel, pregnancy termination, therapeutic abortion, 119

randomised trial, ovarian cancer, chemotherapy, comparison of CP, CAP and CEP combinations, 199
rare ovarian tumor, virilization, 443
reconstructive surgery, vulva, vagina, 113
recurrent uterine myomata,
remission criteria, LHRH, β-hCG, trophoblastic disease, 193
reproductive capacity, hypertension in pregnancy, reproductive history, 45
reproductive history, hypertension in pregnancy, reproductive capacity, 45
reproductive success, endosalpingeal ultrastructure, percentage of ciliated cells, 239
respiratory distress syndrome, mode of delivery, vaginal delivery, cesarean section, labor, 165
retinal artery occlusion, mitral valve prolapse, embolic phenomenon, 133

sacral promontory, pelvic assessment cephalo-pelvic disproportion, 323
salpingotomy, tubal pregnancy, histopathology, trophoblast invasion, 385
Schistosoma haematobium, pelveo-peritoneal schistosomiasis, infertility, 467
secondary polycythaemia, Brenner tumor, bilateral, association with pregnancy, 455
sepsis, maternal mortality after cesarean section, obstructed labor, prophylactic antibiotics, national programmes, developing country, 171
seroepidemiology in developing countries, chlamydial serology, *Chlamydia trachomatis*, chlamydial culture, 377
serum lactic dehydrogenase, ovarian dysgerminoma, isoenzymes of lactic dehydrogenase, α-hydroxybutyrate dehydrogenase, 459
serum pregnancy specific 1-glycoprotein, ectopic pregnancy, conservative or radical treatment, 225
sexually transmitted diseases, urethral syndrome, vaginitis, 177
sexual dysfunction, hyperprolactinemia, infertility, 273
sex steroids, lipids, lipoproteins, polycystic ovarian disease, body mass index, obesity, 401
singleton births, congenital malformations, perinatal deaths, autopsy, prevalence, 63
single layer, conventional closure, uterine incision, cesarean section, strength of uterine scar, strain of labor, 349
social class, large infant, maternal age, parity, weight, height, obstetric complications, 343
specialisation, career, subspecialisation, 293
spontaneous abortion, cervico-vaginal fistula, 139
Spring Coil IUD, ten year follow-up, Hungarian experience, cumulative rates, annual rates, 123
state wide study, maternal mortality, causes, avoidable factors, prevention, 365
sterilization failure, female sterilization, lifetable technique, logistic regression analysis, lifetable cumulative failure rate, 255
stillbirth, kick chart, developing country, fetal activity, antepartum death, fetal monitoring, 353
strain of labor, single layer, conventional closure, uterine incision, cesarean section, strength of uterine scar, 349
strength of uterine scar, single layer, conventional closure, uterine incision, cesarean section, strain of labor, 349

student midwives, family planning practice, Nigeria, 415
subspecialisation, career, specialisation, 293
surgery, vaginal prolapse, endoscopic suspension, 451

Tanzania, cervical cancer, ethnic variation, 395
ten year follow-up, Spring Coil IUD, Hungarian experience, cumulative rates, annual rates, 123
therapeutic abortion, prostaglandin E_2-gel, pregnancy termination, 119
training and service programs, menstrual regulation, Bangladesh, 265
transverse abdominal circumference, ultrasound biparietal diameter, fetal abdominal circumference, cross-sectional study, mixed Nigerian population, 1
trends, morbidity, mortality, malignancies, corpus uteri, Canada, 205
trophoblast, hydatidiform mole, choriocarcinoma, metastatic gestational trophoblastic neoplasm, methotrexate, human chorionic gonadotropin, 421
trophoblast invasion, tubal pregnancy, histopathology, salpingotomy, 385
trophoblastic disease, LHRH, βhCG, remission criteria, 193
tubal pregnancy, histopathology, trophoblast invasion, salpingotomy, 385
twin-1 breech, breech deliveries, twin-2 breech, breech/breech presentation, perinatal mortality, 11
twin-2 breech, breech deliveries, twin-1 breech, breech/breech presentation, perinatal mortality, 11

ultrasonics, endometrium, progesterone, estrogen, ovulation, human, 407
ultrasound biparietal diameter, fetal abdominal circumference, transverse abdominal circumference, cross-sectional study, mixed Nigerian population, 1
umbilical arterial pH, breech, Apgar scores, 37
unexplained infertile women, adrenocorticotropin test, 219
urethral syndrome, sexually transmitted diseases, vaginitis, 177
urogenital infections, *Chlamydia trachomatis,* 381
uterine incision, single layer, conventional closure, cesarean section, strength of uterine scar, strain of labor, 349
uterine neoplasms, computed tomography, cervical carcinoma staging, pelvic neoplasia, 213

vagina, reconstructive surgery, vulva, 113
vaginal delivery, mode of delivery, respiratory distress syndrome, cesarean section, labor, 165
vaginal prolapse, surgery, endoscopic suspension, 451
vaginitis, sexually transmitted diseases, urethral syndrome, 177
vascular response, pre-eclampsia, deep body temperature, microcirculation, 159
virilization, rare ovarian tumor, 443
vomiting, nausea, hyperemesis gravidarum, morning sickness, pregnancy, first trimester, 57
vulva, reconstructive surgery, vagina, 113

weight, large infant, maternal age, parity, height, social class, obstetric complications, 343
